

SHREYAS KULKARNI

Frontend Developer | React.js | Next.js | Javascript

Pune, India | +91-9766906675 | sgkulkarni48@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Frontend Developer with 2.5+ years of experience building responsive, high-performance web applications using React.js, Next.js, TypeScript, and Tailwind CSS. Proven ability to translate UI/UX designs into pixel-perfect interfaces, integrate REST and GraphQL APIs, and optimize Core Web Vitals for production applications. Experienced in Agile/Scrum environments collaborating with cross-functional teams. Currently expanding into AI-powered application development using LLMs, RAG pipelines, and modern AI tools to deliver intelligent, interactive user experiences.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Shadcn UI, Astro.js,

State Management: Redux, Zustand, Context API, TanStack Query (React Query)

Tools & Workflow: CleverTap, Git, GitHub, Postman, Swagger, VSCode, Cursor, GitHub Copilot, AntiGravity, Notion

Architecture & Patterns: Component-based architecture, responsive design, mobile-first design, performance optimization

Work Experience

Frontend Developer – Livlong 365 (IIFL), Thane

July 2023 – Present

- Developed and maintained a suite of customer-facing dashboards using React.js, Next.js, and Tailwind CSS, improving average page load time by ~30% and increasing session duration by 15%.
- Built reusable UI component libraries and layout systems that reduced frontend development time for new features by approximately 25%.
- Integrated REST and GraphQL APIs for complex data visualizations using Axios/Fetch, optimizing network calls and reducing API-related errors reported by users.
- Collaborated with UI/UX designers using Adobe XD to deliver pixel-perfect, responsive interfaces across desktop and mobile, improving design-to-development accuracy to ~95%.
- Implemented client-side routing, lazy loading, and code splitting in Next.js, leading to smoother navigation and improved Lighthouse performance scores (90+ for performance and best practices).
- Participated in Agile ceremonies (daily standups, sprint planning, retrospectives) and used Azure Boards to manage tasks and track progress across sprints.

Projects

Billing System PWA – Subscription & Invoice Management

Tech: Next.js, Shadcn UI, Tailwind CSS, TypeScript, Service Workers

- Built a responsive, mobile-first billing system PWA to manage customers, plans, invoices, and payments with a dashboard-style UI for small businesses.
- Implemented reusable UI components using Shadcn UI and Tailwind CSS, creating a consistent design system and speeding up new feature development.
- Structured the app with Next.js pages and dynamic routes for customers, invoices, and plans, improving navigation and clarity of user flows.

- Added a service worker to cache key assets and API responses, enabling offline access to recent billing data and better performance on unstable networks.
- Optimized performance with code splitting, image optimization, and route prefetching, contributing to improved Core Web Vitals and perceived load time.

Jarvis – Smart AI Assistant

Next.js, React, TypeScript, Tailwind CSS, Node.js, Express.js, GROQ API, Tavily API

- Engineered a full-stack AI assistant with real-time streaming responses, delivering a ChatGPT-like conversational experience with low-latency output.
- Designed and implemented a thread-based conversation architecture to support multi-session chats, improving scalability and structured context handling.
- Integrated LLM APIs (GROQ) for high-speed inference and Tavily API for real-time web search, enabling dynamic, up-to-date responses beyond static knowledge.
- Built a modular backend using Express.js with RESTful APIs, ensuring maintainability and efficient request handling under concurrent usage.
- Implemented streaming UI rendering and optimized state management for seamless user experience during long responses.
- Added markdown parsing with syntax highlighting to enhance readability of technical and code-based AI responses.
- Focused on performance optimization by reducing unnecessary re-renders and improving API response handling for faster interaction cycles.

Education

Bachelor of Engineering (Computer Engineering)

Vishwakarma Institute of Information Technology, Pune

2020 – 2023 | CGPA: 8.9 / 10

Diploma in Computer Engineering

Cusrow Wadia Institute of Technology, Pune

2017 – 2020 | Percentage: 94.06
